

Synthetikpark Hanging Wall Aquarium

If you are looking for something individual and unique, the Synthetikpark is the product for you.

The Hanging Wall Aquarium brings new life into the room and creates a relaxed ambience. Our products are handcrafted and captivate through their distinctive design. They are eye-catching in any room, and suitable for every occasion.

The Synthetikpark Hanging Wall Aquarium in 30 or 50cm diameter design is a living mural. The Synthetikpark Hanging Wall Aquarium comes inclusive with small decorative marbles in different colours, a

plastic plant, which never shrinks, and a water conditioner, which not only protects from algae growth but also dyes the water into beautiful ocean blue.

The Synthetikpark Hanging Wall Aquarium is available in two sizes.

The Synthetikpark Hanging Wall Aquarium is available in two sizes – 30 and 50cm diameter and is handcrafted with indestructible acrylic glass. Your Synthetikpark Hanging Wall Aquarium not only captivates through its design, but also through its sophisticated water treatment techniques. OXYGEN – the patented method to enrich and aerate your water in absolute silence and without electricity allows you can hang up the Synthetikpark Hanging Wall Aquarium everywhere.

OXYGEN from Synthetikpark departs from the standard water pump and provides your fish with oxygen in a gentle and silent manner. Furthermore, OXYGEN helps in reducing the frequency of changing water, breaks down toxins and improves the water quality.

Design from Berlin

Our hanging wall aquarium causes quite a stir.

Your hanging wall aquarium is a feature in different magazines, on design fairs and web portals. Here a small abstract:

Oxygen for your hanging wall aquarium

OXYGEN, which was specially developed for Synthetikpark, is a unique form of oxygenation. OXYGEN creates good atmosphere in the park and reduces the number of water changes.

The principle is easy: Through the reaction of liquid hydrogen peroxide and a special ceramic stone pure oxygen is created. The oxygenation happens in complete silence and without need for electricity. At only 8cm in length and with a diameter of 3.5cm the OXYGEN tablet keeps a low profile.

OXYGEN creates oxygen, breaks down toxins and improves the water quality!
